Graduate Work Placement

Two Information Technology graduates from the ATMC are now studying at the ATMC George Street, Sydney location for the Graduate Certificate in IT Professional Practice while working full time for 12 months through the ATMC Graduate Work Placement initiative.

“I see work placement as a great opportunity to improve my IT skills and enable me to reach a high position in the IT industry.”

Work Placement in Sydney

ATMC Graduate Work Placement initiative.

This initiative has been developed jointly by FUA, The Australian Computer Society (ACS) and the ATMC. The Australian Computer Society CEO, Alan Patterson, welcomed the joint initiative as a tangible example of the ACS’s commitment to engage in “greater collaboration between the education and training system, careers advisors, employers and the ICT professional body. This particular program, leads the way in enabling the demand side in particular – the employers – in taking a greater role in helping shape education outcomes”.

“This new program is a great opportunity for our Information Technology graduates to build on their professional development”, Professor John Yearwood, Dean of the School of Science, Information Technology and Engineering, said. “We welcome the involvement of the Australian Technical Management College (ATMC) in this project. The University is pleased to welcome the additional students from the ATMC and would encourage all prospective students to contact the ATMC for more information about this program,” Professor Yearwood said.

Two students from ATMC commenced working in Sydney in 2014. They are Nitika Mehmi and Abdul Mohammed. Dr Manish Malhotra, CEO of the ATMC, also supported the initiative. “This is the start of an ongoing program to combine excellent academic outcomes with the relevant professional development. The Graduate Certificate will benefit many of our international ATMC IT students studying in Sydney, Melbourne and Geelong”, Dr Malhotra said.

Student Testimonials

Nitika Mehmi

Nitika is from India and studied a Bachelor of Computer Application and Master of Computer Application in India before completing a Masters of Information Technology at the ATMC. Her long term career goal is to see herself working successfully with her IT skills which she gained by studying MIT at the ATMC.

“Choosing work placement was the best decision I ever made. It completely helped me in developing my IT and communication skills. I also learned about work culture, which is the most important part of a successful professional life. I chose the ATMC for the quality courses and personal attention to the students.”

Abdul Mohammed

Abdul is from Hyderabad in India and studied Master of Information Technology Management at ATMC. Before studying at the ATMC, Abdul completed a Bachelor of Technology in India. Abdul’s long term career goal is to pursue a PhD and become a project manager in the IT Industry.

ATMC Sydney

Sydney is Australia’s largest and most famous city. It’s home to beautiful beaches, iconic buildings, historic landmarks, award winning restaurants and a vibrant culture. From the breathtaking views of Sydney Harbour to the serene tranquility of Hyde Park, Sydney has something for everyone.

Reasons for studying in Sydney:

- The biggest city in Australia and the country’s financial and economical hub
- Ranked as one of the ten most liveable cities by both Mercer and the Economist magazine
- Part time work opportunities
- Discounted travel program for international students on public transport
- Offers the best of urban and outdoor living with temperate climate all year round
- International students learn in safe, friendly, multicultural classrooms
- World-class universities, plus a relaxed lifestyle and a wonderful climate, make NSW a destination of choice for students from around the world
- A wide range of on-campus clubs and organisations offer all students the opportunity to pursue their cultural, social and entertainment interests.
